

Fred - I may be
missing something,
but I don't see
any great benefit
in this - unless

October 27, 1972,

you think it
worthwhile in
litigation. *Ken*

Mr. McAllister:

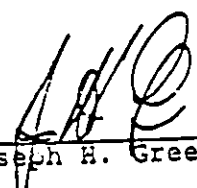

Re: Macdonald Project

Attached are various documents concerning
Miss Eleanor Macdonald, Director of Epidemiology at the
M. D. Anderson Hospital in Houston, relative to her
processing of certain data on cancer incidence in Texas.

Mr. Haas sent the documents to me to forward
to you for your approval or disapproval with reference
to our participation in a CTR special grant to support
Miss Macdonald's work. Apparently the amount to be
granted would be \$46,730, and we would share in this
relative to our market share of cigarette sales. In
other words, our share would be approximately \$3,000.

Mr. Haas advises me that he has reviewed the
attached documents and believes the project to be credible
and of value to our industry.

After you have reviewed the attached documents,
would you please return them to me.

Joseph H. Greer
